**Interpharm Master Keyword Guide: 21 CFR
2002–2003 Edition
USER'S GUIDE**

Each entry in the Master Keyword Guide is arranged as follows:

KEYWORD	SECTION NUMBER	SECTION TITLE (contains the keyword in context) Subpart Title and/or Part Title
---------	----------------	---

The KEYWORD and SECTION TITLE are shown in upper case.
The Subpart Title and/or Part Title are shown in lower case with initial capitals.

Scope, Purpose, Definitions, and Applicability appear at the start of each Part for which they are included, and are not listed separately in the Master Keyword Guide.

USING THE MASTER KEYWORD GUIDE

1. Look up the keyword of interest.
2. Note the context in which the keyword is mentioned in the section title and the details of the subpart or part title.
3. If the reference is of interest, look up the details of the regulations in the Code of Federal Regulations Title 21 (edition revised as of April 2002) under the section number provided.

Readers should note that where a concept or keyword is part of the text of regulations but the word is not included by FDA/DEA in the section title, then the concept-keyword does not appear in this Keyword Guide. Thus, for example, "Good Clinical Practices" is a concept incorporating many different regulations, but the phrase is never used as part of a section title, and hence does not appear in the Keyword Guide.
